Objectives

- 
-  1 Implement the **backend functionality** for Order Express V23, including **database integration**, API development, and server-side logic.
 -  2 Develop a robust **order management system** that handles order processing, tracking, and status updates.
 -  3 Perform thorough **integration testing** to ensure seamless communication between the frontend and backend components.

Process

- Requirement Analysis
- Design and Planning
- Frontend Development
- Backend Implementation
- Integration Testing
- User Acceptance Testing

Conclusion

Order Express V23 is poised to **revolutionize the ordering process for small businesses with limited items**, offering a user-friendly interface and streamlined functionality.
